Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claims 1-14 are pending and subject to restriction requirement.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 9-13, drawn to a method for producing acellular dermal matrix by treating skin sample with protease and surfactant, classified in class 424, subclass 572, for example.
- II. Claims 4-8, drawn to an acellular dermal matrix, classified in class 623, subclass 15.12, for example.
- III. Claim(s) 14, drawn to a composite cultured skin, classified in class 435, subclass 1.1, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III are distinct products as claimed because the claimed products encompass the use of different materials and different structure such as an acellular dermal matrix that is dead tissue or it is devoid of living cells (product of group II) and a cultured skin composite that contains cultured cells or cultured living skin cells (product of group III).

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case acellular dermal matrix suitable for transplantation and wound repairs can be made with various

enzymes including proteolytic enzyme and carbohydrate splitting enzyme, for example: US 4,399,123 (abstract).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
